1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rose Oskanian on July 12, 2004.

The application has been amended as follows:

Please cancel claim 35.

Claim 35 has been cancelled because claims 35 and 36 were essential duplicates of one another. As such one of the claims had to be cancelled.

2. The following is an examiner's statement of reasons for allowance: Applicants' amendment overcomes the rejection of claims 12 to 14, 33 and 35 in the previous office action. Specifically, as amended, the claimed composition is required to be useful in a CVD process while being stabilized against polymerization during extended periods of heating (which is elaborated upon in applicants' specification). There is nothing in the prior art to indicate that the composition therein can be used in a CVD process (note for instance that the prior art adds a relatively large amount of free radical scavenger that could cause undesired impurities in a CVD process) and there is nothing to indicate that the amount or type of free radical scavenger added in the prior art will stabilize the composition against polymerization during extended periods of heating. The Chen reference cited in applicants' PTO 1449 has been considered, but does not qualify as prior against the instant claims due to its later filing date.

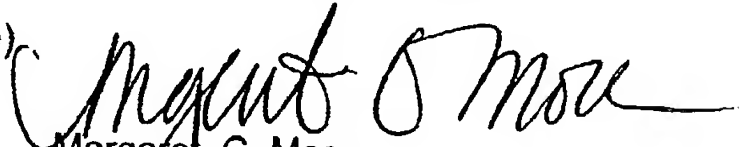

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
